

# **Architectural Design Review**

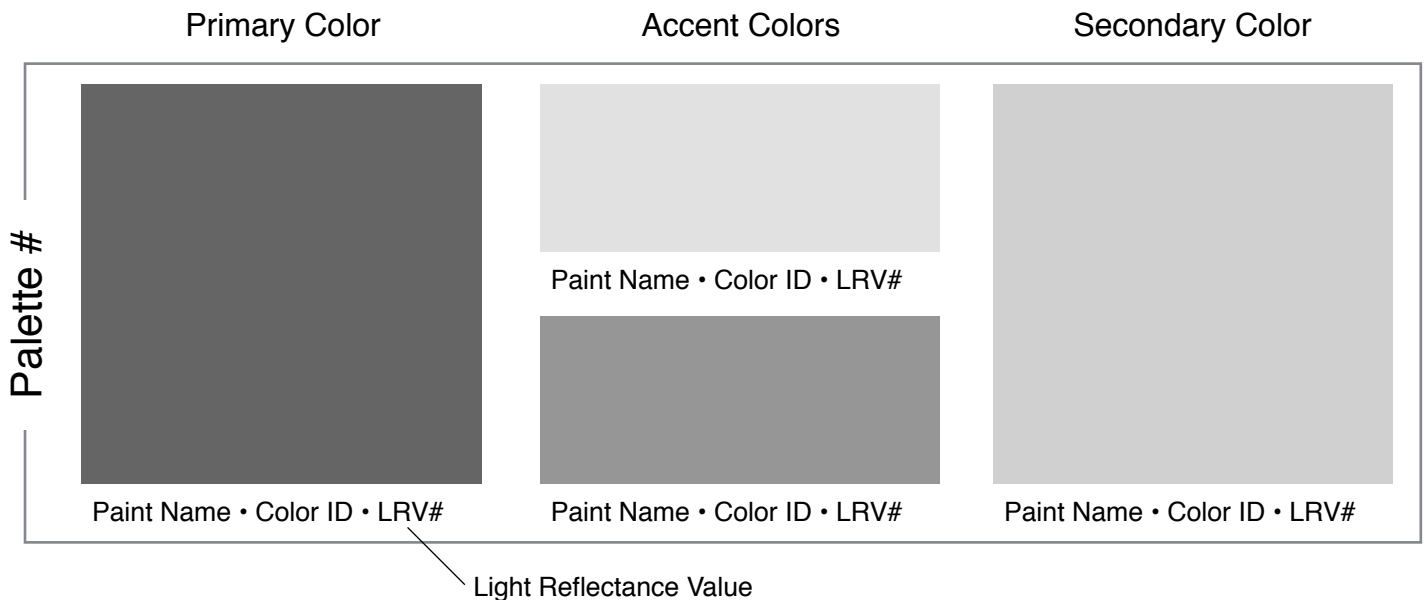

## **Approved Color Palettes**

Painting Home in Same or Approved Color – No review or approval of the Association is required to repaint a home in exactly the same color as it exists or to paint the home in one of the Association pre-approved colors (i.e., Dunn Edwards and Sinclair Paints standard exterior color combinations). Painting a home in colors that are substantially similar to homes in the immediate vicinity of the property also does not require review or approval of the Association.

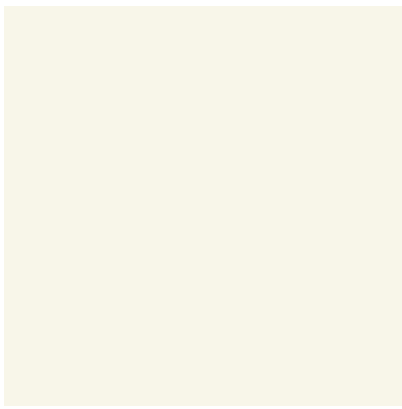

However, if you are painting your home in a color that is not one of the pre-approved colors or a color that is not substantially the same color as currently exists on the home or substantially similar to that on homes in the Association in the vicinity of the Member's home, or if you are painting brick or stone, then the colors must be reviewed by the Board. For information to Members, the Board generally approves "off-white" shades for the main color of a home, but does not approve dark or bright colors.

**Please ensure that the elements of your home are within one of the palettes listed below. If you would like to choose other colors that do not fit into a pre-approved palette, please fill out a Small Projects application for Board Review.**

The coordinated color palettes each have a number, and set of swatches with information. As shown below, the leftmost color is the primary, the secondary color is on the right, and the smaller swatches in between are accent colors. These are guides to help in the process of choosing colors and the appropriate application in combination.

Palette 1

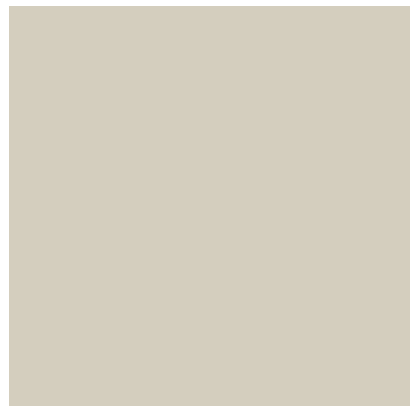

Swiss Coffee • DEW341 • LRV83

Red Contrast • DEA106 • LRV12

Cover of Night • DE6239 • LRV7

Porous Stone • DE6220

Palette 2

Whole Wheat • DE6124 • LRV26

Pebble Walk • DE6277 • LRV41

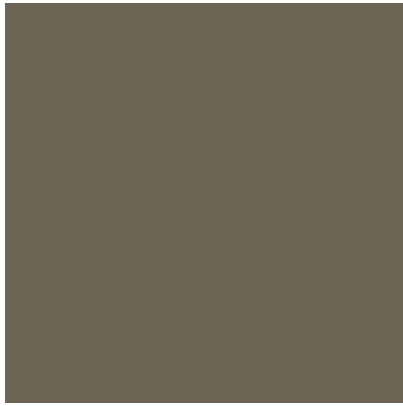

Deep Brown • DE6077 • LRV10

Pewter Patter • DET627 • LRV46

Palette 3

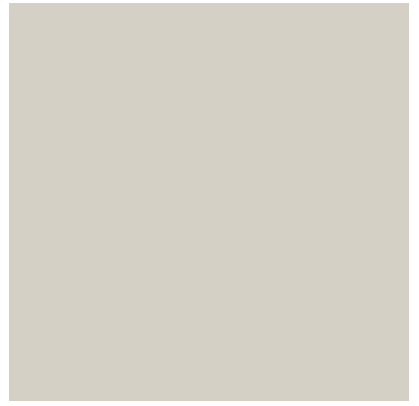

Shaker Grey • DE6231 • LRV13
